North Africa sine wave inverter installation

Overview

What is a sine wave inverter?

300 to 450 VDC, when power is from electric vehicle battery packs in vehicle-to-grid systems. Hundreds of thousands of volts, where the inverter is part of a high voltage direct current power transmission system. Pure Sine wave inverters which produces a multiple step sinusoidal AC waveform. This is referred to as a sine wave inverter.

Which inverter systems are available in South Africa?

PHD has the widest range of Inverter systems in south africa, and the southern african region, we have both pure and modified sinewave inverter systems, with and with out battery chargers. We offer Victron Range aswell as the state of the are super home (ST2X) range and the Studer range of inverters directly from Studer Switzerland.

Which inverter is best for solar & AC back-up systems?

PHD has a comprehensive range of inverter systems designed for solar and AC back-up systems. Super Home Inverter is an all-in-one user-friendly inverter. It is easy to handle as well as suitable and compatible for almost all home/office applications. PHD has the widest range of Sine Wave Inverters in South Africa, and the southern African region.

What is the input voltage for a solar inverter?

The input voltage depends on the design and purpose of the inverter. Examples include: 12 VDC, for smaller consumer and commercial inverters that typically run from a rechargeable 12 V lead acid battery. 24 and 48 VDC, which are common standards for home energy systems. 200 to 400 VDC, when power is from photovoltaic solar panels.
