North American BESS rooftop solar panel prices

Overview

How much would a rooftop solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$28,700 and save \$1,567 per year. PGE and the state of Oregon both offer incentives for rooftop solar and battery energy storage. With the utility, state, and federal incentives, the combined solar and BESS system could be paid back within 11 years.

Are rooftop solar panels or battery energy storage systems worth the cost?

Pacific Northwest National Laboratory (PNNL) researchers are here to help. Homeowners must navigate a quagmire of complicated policies to determine whether the energy savings from rooftop solar panels or battery energy storage systems (BESS) are worth the high upfront cost.

How much would a solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$29,200 and save \$1,357 per year. Without financial incentives, the payback period for the rooftop solar and BESS would be around 28 years, but with the Investment Tax Credit it's brought down to 20 years.

What is rooftop solar & Bess?

Rooftop solar and BESS can provide both energy to homeowners as well as relieve some load on the power grid as a whole. "We want readers to be able to use this guide to make informed decisions for their family, their household, and their community going forward," Kerby said.
