How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters?

Aloha, Can I parallel two of the same MSW inverters @ 110v each and get 220v single phase?

If so, then would I tie the two neutrals together?

Reference my system below. thanks
