Onsite Energy Outdoor Wireless Solar

Overview

What are onsite solar installations?

Onsite solar installations are renewable energy systems deployed directly on your business premises. These systems offer immediate and visible benefits while giving you direct control over your energy generation.

Should businesses choose onsite or offsite solar?

As businesses work toward reducing their carbon footprints and energy costs, they face a pivotal decision: should they opt for an onsite renewable energy solution, like a rooftop solar installation, or consider an offsite option, such as grid-connected Open Access solar?

.

What are offsite solar solutions?

When physical space is limited or energy requirements exceed onsite generation capacity, offsite solar solutions provide a viable alternative. These arrangements allow businesses to source renewable energy through the grid, offering flexibility and scalability without the constraints of physical installation.

How do I purchase a ventev Wi-Fi Solar System?

For more information or to purchase, contact Ventev: 800.851.4965 or sales@ventev.com Ventev's Wi-Fi Solar System is a complete, fully-integrated power enclosure system that is pre-wired and pre-assembled for on-site installation of outdoor access points requiring PoE/PoE+ power.
