Outdoor 2 kW solar panel

Overview

What is a 2KW solar panel system?

A 2kW solar panel system is a 2 kilowatt solar panel that generates around 8kWh per day. It is perfect to run all the major appliances of a small house, allowing you to enjoy unlimited power in an environmentally friendly way.

How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

How much space does a 2KW Solar System need?

A 2kW solar kit from GoGreenSolar requires about 107 square feet of space. Solar panels with microinverters allow you to place panels in various locations, directions and angles on your roof. This choice will offer you more flexibility if space is at a premium.

What are the benefits of a 2KW Solar System?

Customers can benefit from significant energy savings, reducing reliance on traditional utilities and resulting in lower bills. Be the first to write a review. This 2kW complete off-grid kit is perfect for homes, offices, and cabins. Kit includes: 2kW solar panels, 10.24kWh batteries, 5kW inverter charger - Easy to Install & 5 Year Warranty
