Outdoor power battery box

48V 100Ah

Overview

What is a battery box?

A battery box has two purposes. Firstly it is a way to safely and securely store your batteries. Secondly, it provides a number of outlets for a battery, allowing you to power multiple devices at once, using USB, DC and even AC connectors.

How many batteries can a metal battery box hold?

We supply various sizes of enclosures for holding batteries and associated electronics. Our most popular metal battery boxes are the NEMA 3R (rainproof), mill finish aluminum boxes, which can hold from a single battery up to 6, 8, or 10 if pad mounted. Many standard mill finish aluminum metal battery boxes are in stock, ready to ship.

Do I need a battery enclosure for my off-grid system?

If you're using batteries with your off-grid system, you will need to protect them from the elements and separate them from living areas. Often that means a dedicated enclosure. We supply various sizes of enclosures for holding batteries and associated electronics.
