

# Outdoor wireless base station AP settings

## Overview

---

What is the TP-Link outdoor wireless base station?

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users. Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas.

What is Outdoor Mode on unifi access points?

Outdoor Mode on UniFi access points is designed for exactly what it sounds like, outdoor use. It adjusts power, disables DFS channels, and optimizes signal behavior for open-air environments. When used correctly, it boosts long-distance performance and ensures compliance with wireless regulations.

What is an indoor AP?

Indoor APs are, usually, equipped with omnidirectional antennas (which allow broadcasting the signal in a "donut" shape around the AP), which have a relatively low antenna gain. For indoor and short distance outdoor installations, it is a perfect antenna to use.

How do you install an outdoor access point?

The Process of Outdoor Access Point Installation Use a marker pen to mark the location of the installation holes on the wall. Use an impact drill to drill holes in the wall according to the marked positions. Use a hammer to tap the expansion bolts vertically into the hole. Fix the bracket on the wall with four M6 screws.
