Portable Multimedia Power Supply

Overview

A portable power supply is very much like a generator. They provide you with electrical power when you are camping or if the power is out in your home. There are a few differences, however, between a porta.

How powerful is a portable power supply?

This portable power supply is also pretty powerful for its size and price range. If all you are looking for is a way to charge up your cell phone, then this would be a great option. For instance, if you have an iPhone, you would be able to charge it about 15 times before you ran out the power supply of the power pack.

How long do portable power supplies last?

The batteries that are used in portable power supplies are usually lithium-ion batteries. Even if these batteries are not used constantly, they will still age. They do not have a terribly long lifespan. In fact, even if you barely use your power supply, the battery will probably only last you two to three years at full capacity.

How do you charge a portable power supply?

You can choose to charge it with a wall plug, DC outlet in your car, or, if you are feeling adventurous, with solar panels. This makes it a truly versatile device that is designed to be used both in the home and on the go. If you are in the market for a great portable power supply, we highly recommend that you give this one a try!.

Do you need a portable power supply when camping?

While they provide plenty of power, they also provide plenty of noise and noxious fumes. Thankfully, there is a better option out there. Whether you want a backup in an emergency or just a way to power your phone when you are camping, you need to make sure you have the best portable power supply you can get your hands on.
