Portable UPS power supply

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) protect sensitive electronics like desktop computers and external hard drives. Data centers worldwide rely on UPS systems to safeguard valuable consumer, government, and commercial data and prevent damage to costly servers, network drives, and storage infrastructure.

What is an uninterrupted power supply (UPS) battery backup?

An uninterrupted, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics.

How many volts does a UPS backup use?

Most UPS backup models will indicate their particular volt-amperes (VA) output. The higher the VA rating the more stored power and running capacity available. For single devices and smaller operations, 200 to 450 volt-amperes will generally suffice. Need more power?

.

Why do you need a battery for UPS?

A battery for UPS allows users to save data, files and any other information before safely powering down equipment in the event of power loss. Choose UPS backup models with multiple outlets to accommodate larger spaces and a higher number of devices.
