# **Portable mobile energy storage DC charger**

## Overview

---

### What is kempower movable Charger?

Kempower Movable Charger is used on all continents by thousands of happy customers already. Kempower Movable Charger is connected to 32 A, or 63 A socket for full power. It offers 50 kW of charging power for one, or 25 kW for two fast charging outlets simultaneously. Both CCS1 and CHAdeMO charging methods are supported.

### How to use EV fast charger on Wheels?

Connect input cable to 63 A or 32 A socket and start charging. The EV fast charger on wheels can be transported (e.g. in the back of a van or a truck). It can operate in any desired location. The charger wheels can be removed for fixed installation. Made for heavy-duty fast charging in challenging locations.

### What types of EVs can kempower movable Charger charge?

Can charge all types of EVs like electric boats, mining vehicles, buses, trucks and more. Kempower Movable Charger is a transportable DC fast charger suitable for charging all types of electric vehicles, cars, trucks, buses, boats and off-highway vehicles.

### Where can I charge my EV?

You can easily charge EVs at events, car shops, bus and truck depots, boat harbors, building sites and mines. Kempower Movable Charger is used on all continents by thousands of happy customers already.
