

# Price inquiry for solar container shipping costs

## Overview

---

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. How to ship solar panels from China?

**Shipping Methods** You have two main shipping options when importing solar panels from China: sea freight and air freight. Each has its advantages, depending on your needs. **Sea Freight:** Sea freight is the most economical option, particularly for large shipments. It takes longer but significantly reduces costs per unit.

How are solar panels shipped?

Most solar panels are shipped via 20ft or 40ft containers. Depending on the quantity, you may choose between FCL (Full Container Load) or LCL (Less than Container Load). **FCL:** If you are importing a large number of solar panels, booking a full container is cost-effective and provides better security for your goods.

How to import solar panels?

Ensure that the solar panels comply with the import regulations of your country. Check for necessary certifications such as CE, TUV, and UL to ensure the panels meet quality and safety standards. Non-compliant products may be refused entry or face penalties.

How much does container shipping cost?

China-Europe rates are around \$3.70/kg, China-North America at \$5.30/kg, and Southeast Asia-North America at \$4.63/kg. Use the cost calculator and keep up to date with container shipping pricing trends to get a better idea of what your total landed costs will be. China – N. America weekly prices dropped 5% to \$ 5.30/kg.
