

## **NKOSITHANDILEB SOLAR**

# **Price of a 10kW collapsible container for European mining applications**

## Overview

---

What is a collapsible bulk container with extended length?

The collapsible bulk container with extended length is designed to handle extremely long and hard-to-fit parts. All extra long bulk containers are available with wide access doors and manufactured from high-density polyethylene using a structural foam-molding process for increased durability.

What is a heavy duty collapsible bulk container?

Our heavy duty collapsible bulk containers are part of the BulkPak® line and transport even bulky, hard-to-fit parts safely. At the same time, the large FLCs hold up to 900 kg. With a return ratio of up to 1 : 2,6, the collapsible bulk containers optimise space utilisation during storage and return transport.

What is a non collapsible bulk container?

The collapsible or non-collapsible bulk containers are designed to withstand the rigorous, heavy load requirements in the manufacturing environment. With a weight capacity of 900 kg and extended length footprints, the ORBIS XXLPak hold heavy and bulky components.

What are xxlpak reusable bulk containers?

These reusable bulk containers are designed for a long service life and are available in a variety of footprints. From extended length collapsible designs to durable, fixed wall designs, the XXLPak reusable bulk containers are ideal for handling, storing and transporting long and heavy components in the supply chain.
