# **Price of a 20kW Mobile Energy Storage Container for Indian Mines**

## Overview

---

Are energy storage systems the backbone of India's utility-scale ESS auctions?

Standalone Energy Storage Systems (ESS) are becoming the backbone of India's utility-scale ESS auctions, accounting for 64% of the total tenders issued between January and March 2025 alone, according to a new report by the Institute for Energy Economics and Financial Analysis (IEEFA) and JMK Research & Analytics.

How much does a battery energy storage system cost in India?

"In recent auctions, battery energy storage system tenders in Maharashtra and Rajasthan secured tariffs as low as Rs219,000-221,000 per megawatt (MW) a month (US\$2,561-\$2,586/MW/month), representing almost a 40% reduction compared with non-VGF projects with similar specifications," he added.

What is a Megatrons 1MW battery energy storage system?

MEGATRONS 1MW Battery Energy Storage System is the ideal fit for AC coupled grid and commercial applications. Utilizing Tier 1 280Ah LFP battery cells, each BESS is designed for a install friendly plug-and-play commissioning. Each system is constructed in a environmentally controlled container including fire suppression.

How much ESS capacity does India have in 2025?

The report finds that various Indian agencies tendered 6.1 gigawatts (GW) of Standalone ESS capacity in the first three months of 2025. "Standalone ESS are ideal to facilitate the rapid development and deployment of variable renewable energy (VRE) resources across India.
