Price of inverter for lighting

Overview

What is a lighting inverter?

A lighting inverter is a device that converts DC battery power to standard AC voltages to provide backup for lighting systems in an emergency. It can also help protect against 'brownouts' or other voltage drops. What is an emergency lighting inverter?

It provides power to your emergency lamps and fixtures in a power loss.

What is an emergency lighting inverter?

An emergency lighting inverter converts DC battery power to standard AC voltages to provide backup for lighting systems in an emergency. They are commonly used with fire alarm systems, emergency lighting, exit lighting, and lighting control systems, among other critical or life safety-related equipment.

How much does an inverter cost?

At the average \$0.18 per watt and with the average installation costing \$2.93 per watt, inverters usually account for about 6% of total installation costs. This means that a typical 5.6-kilowatt installation costs \$16,408 in total and the inverter should account for about \$1,000 of that.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltages to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.
