# **Purchase Guide for 40kWh Solar Containerized PV Units**

## Overview

---

How many units can a 40kW Solar System produce?

A 40kW solar system can produce up to 160 units/day and 4800 units per month. For installing this capacity solar system 240 sq. meter space (shadow free) is needed. See the detailed specification of 40kW on grid solar system below. Read more: [40kW Solar System Price With Complete Details](#).

How to choose a 40kW Solar System?

While grid-tie configuration is the most common choice, you can also go for hybrid or off-grid design. The problem with a 40kw solar system with batteries is getting storage of a capacity that is large enough. Battery storage provides backup during power outages in the grid. However, it's going to greatly increase your expenses.

What is a 40 kW solar system?

These 40 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions. These are complete PV solar power systems that can work for a home or business, with just about everything you need to get the system up and running quickly.

Should you install a 40kW Solar System with batteries?

The problem with a 40kw solar system with batteries is getting storage of a capacity that is large enough. Battery storage provides backup during power outages in the grid. However, it's going to greatly increase your expenses. Ground-based systems are cheaper to install than rooftop ones.
