Reasons why new energy sites are not online yet

Overview

Why is my website using up a lot of energy?

Getting an alert that says a certain webpage is using up significant energy sounds pretty concerning, but the cause of the error message is actually pretty simple. Safari will generally show you this message when you have a website that's using up quite a bit of system resources.

Are wind and solar projects running into a big obstacle?

Tons of green energy projects, both wind and solar, want to connect to the grid. But they're running into a surprising obstacle. AILSA CHANG, HOST: The dream of clean energy is becoming reality. Companies are drawing up plans for thousands of wind and solar projects all across the country. But many are running into a big obstacle.

Why is energy transition so difficult?

The energy transition also is affected by the lack of energy literacy, or understanding, among the general population. "Our world is highly 'energy unconscious' despite how intimately energy and energy use are intertwined with our daily lives and work," Garrett said.
