

# Replacing the battery of a home solar light

## Overview

---

How do I replace my solar lights battery?

Follow these steps for an effective battery replacement. **New Batteries:** Check the specifications for your solar lights to select the correct type, commonly NiMH (nickel-metal hydride) or lithium-ion batteries. **Screwdriver:** A small Phillips or flathead screwdriver helps open the battery compartment.

What should I do before replacing solar light batteries?

Before replacing the solar light batteries, turn off the power to your solar lights to ensure your safety during battery replacement. 4. Use a soft cloth or paper towel and rubbing alcohol to clean the contacts of the solar light before installing new batteries. 5.

How often should solar light batteries be replaced?

Worn-out solar light batteries may result in acid leakage, which can cause damage to the solar light's electrical components. It's a good idea to replace the rechargeable solar light batteries at least once a year to ensure adequate lighting and longevity. Which are the most suitable replacement batteries for my solar garden lights?

.

Can I mix two types of solar light batteries?

No, don't mix the two types of solar light batteries within the same unit. The one thing to always bear in mind is to replace all the exhausted batteries in your solar lights. If there are two NiCad batteries in your solar lights, replace both of them with a set of NiCad or NiMH batteries.
