Russian Energy Agency solar Energy Storage

Overview

Is solar energy on the verge of a major expansion in Russia?

Solar energy in Russia might be on the verge of a major expansion thanks to a government support program for renewable energy sources, industry experts told The Moscow Times.

Does Russia have sufficient solar energy?

Despite the common misconception, Russia has more than enough insolation to produce solar energy. Moscow-based renewables company Unigreen Energy, which has received a government guarantee for its solar power contributions, confirms this.

How much does a solar power plant cost in Russia?

According to Russian suppliers for solar power plants (altecology.ru, 2019; Solar controller, 2020), the average cost of equipment for solar power plants with an installed capacity of 10 MW is 310 million rubles.

What does Unigreen Energy say about Russia's insolation?

Unigreen Energy said Russia has more than enough insolation — solar radiation hitting an object — to produce solar energy. There is no sun there! Well, our data tells us differently.”
