

NKOSITHANDILEB SOLAR

Rwanda off-solar container grid inverter supply

Overview

What is Rwanda's off-grid solar electrification strategy?

The Rwanda off-grid solar electrification strategy comprises solar lanterns, 1 solar home systems (SHSs), solar mini-grids, solar water pumps, and solar water heaters. Although a country-wide SHS subsidy program is underway, it is pertinent to evaluate how this unfolding energy market will configure and impact the execution of the SDGs in Rwanda.

Why are off-grid solar companies entering the Rwandan market?

The transformation of the off-grid solar sector has played a critical role in the country's rural electrification and development, and the policy and business environments have resulted in dozens of off-grid solar companies entering the Rwandan market.

What can Rwanda learn from off-grid solar?

The decade of off-grid solar is a valuable lesson for the future calling for more deliberate steps towards just energy transitions for Rwandans, and as a result, a more just society at large. 1.

How many Rwandan households are connected through off-grid solar systems in 2021?

Circa 17.8% of Rwandan households are connected through off-grid, predominantly solar systems in 2021 (REG, 2021) which play an important role in the country's electrification strategy and the achievement of ambitious development goals.
