

**NKOSITHANDILEB SOLAR**

# **Single-phase folding containers for wastewater treatment plants in South Africa**

## Overview

---

What is sanitech re-deployable wastewater treatment?

Sanitech supplies rapidly deployable, and re-deployable wastewater treatment solutions. These mobile and modular plants convert domestic wastewater into reusable water for agricultural purposes or to be recycled in industrial applications. It is also possible to treat this water to potable water quality standards.

What is a HWT containerized sewage treatment plant?

An HWT containerized sewage treatment plant is a compact and mobile system designed to treat wastewater. It works by collecting sewage into a modular container, where various biological and mechanical processes break down and remove pollutants.

Who is water & wastewater Africa?

Water And Wastewater Africa is a key provider of Decentralised Water and Wastewater Treatment Systems in South Africa, Africa, and abroad by providing turn-key solutions through expert consultation, sustainable products, project management, and services. We need to completely change our perception of wastewater, its treatment and reuse.

Are modified shipping containers right for your water treatment plant?

It's important to note that while modified shipping containers offer these advantages, the specific design, customization, and regulatory compliance of the water treatment plant must still be considered to ensure optimal functionality, performance, and adherence to local water quality standards.
