# **Small solar lights placed outdoors**

## Overview

---

What are the best outdoor lights for outdoor spaces?

Our top pick for most outdoor spaces is the AloftSun Motion Sensor Solar Landscape Spotlights. We love these lights so much, we've tested them twice. Both times we found them to be durable, easy to use, and bright. We also love that these spotlights can detect motion from as much as 33 feet away, depending on the setting.

Where should outdoor solar lights be placed?

To get the best results from your outdoor solar lights, place them where they get six to eight hours of direct sunlight. If they're designed to be wall-mounted, consider placing them up high, so they're closer to the sun.

How do I choose the Best Lighting for my yard?

Before choosing just any one for your yard, start by asking yourself how much brightness you need and if the light needs to be direct or spread out. Solar pathway lights guide you when walking at night, while mounted spotlights may have security monitors or be intended to highlight landscape features.

How do you Mount outdoor solar lights?

Mounting: Some outdoor solar lights mount like traditional light fixtures using screws, including our best wall-mounted pick, the Cyhkee Motion Sensor Solar Powered Wall Lanterns.
