## Overview

---

What is a solar Ware 500 inverter?

The SOLAR WARE 500 is an advanced multilevel inverter system offering up to 500kW, with an operating range of 320 ~ 600 V. SOLAR WARE 500 operates at 97.7% maximum efficiency. With high efficiency and robust design, TMEIC can significantly maximize array performance and uptime.

What is the best solar inverter for home use?

A pure sine wave is the best inverter choice for home use. It works with or without the power grid. Appliances last longer and run better. This makes your solar system more efficient. It ensures that all your devices get clean and stable electricity. This hybrid inverter, when installed, works with the power grid or off-grid.

How much power does a 2 in 1 solar inverter have?

Max. PV Array MPPT Voltage Our 2-in-1 hybrid solar inverter controller boosts a robust 5500W pure sine wave output, outstanding 11000VA peak performance, and advanced MPPT charging technology, achieving a 96% conversion efficiency.

How many volts can a solar inverter handle?

It can handle solar arrays with a maximum of 5500W and a voltage range of 500V DC. Wide Application: It is suitable for all inductive loads, some motor-type loads, and half-wave loads. Battery management: This inverter is suitable for a 48V battery system and supports lead-acid batteries and water batteries.
