Solar Air Conditioning in Manila

Overview

Are solar panels good for air conditioning in the Philippines?

When considering solar panels for air conditioning, it's essential to understand the specific requirements of your aircon unit. A common size for household air conditioners in the Philippines is the 1 horsepower (HP) unit. This unit is efficient and suitable for effectively cooling smaller areas.

Should you switch to solar powered air conditioning in the Philippines?

Switching to solar powered air conditioning comes with several advantages that can be quite appealing to homeowners in the Philippines: One of the most beneficial aspects of solar powered air conditioning is the substantial reduction in monthly electricity bills.

How much does a solar aircon cost in the Philippines?

For example, a 4hp aircon that runs during the daytime will require a 5.4kWp solar panel system that costs around Php340,000. Solaric CEO and President Mike De Guzman says, "My vision is for every Pinoy to turn on the aircon without hesitation. Anytime - most especially in the midst of the scorching summer heat.

Does using an air conditioner increase your energy bill in the Philippines?

Using an air conditioner in the Philippines can increase your energy bill by up to 50%. This is because an air conditioner running for hours in a home or commercial establishment consumes about 63% of the total energy.
