Overview

How much does it cost to install solar window screens?

Installing solar window screens for one window may cost you more per screen than if you ordered screens for all the windows in your house. This is because many solar screen companies have a minimum order requirement, which could be, for instance, \$400 or more.

What solar glass & energy saving solutions does AGC offer?

In partnership with AGC we are able to offer a wide variety of Solar Glass & Energy Saving Solutions to our clients. Active Glass is a line of Building Integrated Photovoltaic (BIPV) products. Active Glass can be custom made to meet the demands of design and fit the architectural and building facade needs.

How do I get solar screens?

When it comes to getting solar screens, you have two main options: hiring a professional company for installation or opting for a DIY kit to install them yourself. Hiring a professional company involves researching local experts, getting multiple quotes, checking references and reviews, and scheduling consultations to assess your project.

What is a solar screen?

Solar screens are a type of mesh that shield against harmful UV rays and intense heat from the sun. Although they don't offer complete shade, they bring a significant reduction in glare and natural light indoors. You can find solar screen fabrics in a variety of sizes and shapes, and can even get a customized one for your window frame.
