Solar installation components and prices

Overview

How much does a solar panel installation cost?

Cost Per Kilowatt Installed Solar panel installation costs vary significantly based on location, system size, and quality. Here are 2025 average costs across major markets: Example: A typical 6 kW residential system costs between $15,000 and $36,000 before incentives, depending on your location and chosen components.

How much does a solar system cost?

The average solar power installation price ranges from $2.74 to $3.30 per watt in 2024, with most residential systems costing between $16,500 and $30,000 before incentives. After applying the 30% federal tax credit, homeowners typically pay between $12,600 and $21,000 for a complete system. System Size: 5 kW Before Incentives: $13,700-$16,500.

How much does a solar monitoring system cost?

Monitoring System A monitoring system typically costs around $500 to $1,000. Since it is for equipment safety, you can add this cost, too. The cost will be affected by its features and complexity, and an advanced one will be expensive. Although the initial investment in solar installation may seem significant, you can't skip it.

How much does a solar system repair cost?

Professional cleaning services cost around $150-$350 annually, depending on system size and location. Repairs, although less frequent, may involve replacing inverters, which can cost $1,000-$2,500, or repairing damaged panels, ranging from $200-$600 per panel. Regular checkups can identify issues early, reducing long-term costs.
