Solar modules exported at low prices

Overview

How much are Chinese solar modules worth?

Prices for Chinese solar modules have reached record lows, according to the latest data from OPIS. The benchmark assessment for TOPCon modules from China has fallen to \$0.100 per watt, a decline of \$0.005 per watt compared to the previous week. Similarly, Mono PERC module prices have also dropped by \$0.005 per watt, now standing at \$0.090 per watt.

How much do Topcon solar modules cost in China?

The current tradable indications for TOPCon modules are being reported at \$0.10 per watt Free-on-Board (FOB) China. As the market struggles with low demand, these new record low prices highlight the ongoing challenges faced by Chinese solar module makers.

How many solar cells did China Export in 2024?

Chinese cell and module exports grew in 2024, according to customs data. Image: Trina Solar. China exported 7.79 billion solar cells in 2024, a year-on-year increase of 38.2%, according to the latest date from Chinese customs.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93GW of PV modules, an increase of 13% compared to 207.99GW in the same period in 2023. With another 2 months to go, these figures can be expected to go up further. Meanwhile, this 10M 2024 output volume is close to the ...

As China PV modules reach record-low prices, having dropped from USD 0.23/W in January 2023 to USD 0.13/W in November 2023, PV manufacturing efforts in Australia, ...

PRICE INDEX , October 2025 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate ...

China sets export record for low-cost solar modules China exports a record 120,427 MW of solar modules in the first half of 2024, ...

PV modules are the central component of the solar industry. This analysis reviews market conditions that affect solar panel pricing and ...

13 hours ago Shares of local solar groups have fallen this year as module prices drop. Gross margins at JinkoSolar, for instance, fell to 3.1 per cent in the year to September, down from 16 ...

At the same time, focus has shifted to the development of high-efficiency modules, sources told Fastmarkets on Monday January 6. ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

The massive increase in solar module production capacity and PV installations in China is helping the country to maintain relatively ...

Chinese modules were 57% cheaper than the modules produced in the U.S. and EU during 2022 // China's solar exports surged by 64% to \$52 billion in 2022, on the back of low ...

Solar modules exported to Europe continue to contend with elevated freight rates on matters in the Red Sea. OPIS heard freight rates of about \$0.0164-0.0175/W (about high ...

As China PV modules reach record-low prices, having dropped from USD 0.23/W in January 2023 to USD 0.13/W in November ...

Solar modules exported to Europe continue to contend with elevated freight rates on matters in the Red Sea. OPIS heard freight rates ...

Europe is aware of this problematic reliance, but it prioritizes solar PV demand over domestic solar PV supply to decrease its electricity ...

The rebate reduction will push enterprises to rethink their strategies for industrial restructuring and enhancing product technology. With rising costs, shrinking profit margins, ...

China's solar exports hit record highs in volume but saw steep price declines, reflecting overcapacity, fierce competition, and global ...

Solar modules exported to Europe continue to contend with elevated freight rates on matters in the Red Sea. OPIS heard freight rates of about \$0.0164-0.0175/W (about high \$6,000s ...

InfoLink's customs data shows that China exported about 23.38 GW of PV modules in March 2025, up 44% MoM but down 5% YoY from 24.51 GW. China's total module exports ...

Previous Price Low -> \$0.07 to \$0.09 per watt (The historic low price range for solar modules reached in 2024 and early 2025 before the correction.) Policy Driver -> 13% ...

As the market struggles with low demand, these new record low prices highlight the ongoing challenges faced by Chinese solar module makers. Exported solar modules destined ...

Solar wafers and polysilicon made in China have seen record-low prices this quarter, according to Rystad Data. The proposed 50 percent tariff would raise prices, but not ...

As the market struggles with low demand, these new record low prices highlight the ongoing challenges faced by Chinese solar module ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

China's solar exports hit record highs in volume but saw steep price declines, reflecting overcapacity, fierce competition, and global market shifts.

For instance, in August 2024, the 540-watt mono solar modules were exported from India at a unit price of USD 117 while it was imported from other countries at a much ...
