Solar power station for sale in Albania

Overview

What are Albania's new solar projects?

These solar projects are expected to add 240 MW of capacity, significantly enhancing the country's renewable energy portfolio. The French renewable energy company Voltalia has announced plans to build new energy projects in Albania, including the Karavasta and Spitalla solar parks.

How much does a solar power plant cost in Albania?

In April 2025, Albania's Ministry of Energy and Infrastructure unveiled plans to construct a 3.3 MW solar power plant on 5.2 hectares of land in Korça. The project, estimated to cost around 2.7 million euros, is set to be completed in 12 months. The Korça solar plant is part of a broader strategy to boost Albania's renewable energy capacity.

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Why are solar panels being developed in Albania?

The ongoing development of solar panel projects in Albania is a testament to the country's commitment to renewable energy. These projects not only contribute to Albania's energy security but also play a crucial role in reducing carbon emissions and combating climate change.

Albania embraces solar power with the Karavasta power station - 234,828 new solar panels generating 140 megawatts to power ...

The development of these solar power plants is expected to contribute significantly to Albania's energy security and economic growth. By reducing the country's dependence on ...

A ceremony took place in Albania, 22 July 2025, to sign the agreement to build a new solar photovoltaic power plant at Belshi. The EUR42 million project is co-financed by an EU ...

French company Voltalia broke ground on the Spitala solar park in Albania of 100 MW, scheduled for commissioning in 2027.

Vega Solar is a prominent renewable energy company in Tirana, Albania, specializing in the manufacture and installation of certified solar systems. They offer a wide range of solar energy ...

This project highlights Voltalia's ongoing development and commitment in Albania, the country's leading solar producer and a long-standing pioneer in turnkey photovoltaic power ...

French company Voltalia broke ground on the Spitala solar park in Albania of 100 MW, scheduled for commissioning in 2027.

Voltalia will sell 70 MW of the electricity produced at the solar park to Albania's state-owned energy distribution company, whereas the ...

Four applications were submitted in Albania for solar power projects with a combined capacity of 235 MW.

To date, Voltalia operates Karavasta, the largest solar park in Albania with a capacity of 140 MW. This project provides approximately ...

Four applications were submitted in Albania for solar power projects with a combined capacity of 235 MW.

To date, Voltalia operates Karavasta, the largest solar park in Albania with a capacity of 140 MW. This project provides approximately 3.2% of the country's total electricity ...

Albania embraces solar power with the Karavasta power station - 234,828 new solar panels generating 140 megawatts to power homes and protect local species. 53 families ...

The development of these solar power plants is expected to contribute significantly to Albania's energy security and economic growth. ...

A ceremony took place in Albania, 22 July 2025, to sign the agreement to build a new solar photovoltaic power plant at Belshi. The ...

Need reliable Albanian energy suppliers? Discover certified providers of solar systems, wind turbines, and smart energy meters. Compare options and request quotes today!

Voltalia will sell 70 MW of the electricity produced at the solar park to Albania's state-owned energy distribution company, whereas the remainder will be sold in the market,
