Solar power with grid backup in Atlanta

Overview

Why is Atlanta a good city for solar energy?

The city streamlined solar permitting processes and efforts to make solar energy more accessible to residents and businesses. By adopting user-friendly systems and offering incentives, Atlanta serves as a model for other cities in the state, contributing to Georgia's renewable energy goals.

How much does a solar system cost in Atlanta?

In Atlanta, the average cost per watt is \$2.67. The average Georgia household needs a system with a capacity of 11.17 kW to fully offset their electricity costs. Depending on your household energy use, you might need a smaller or larger one. Average total solar installation costs by system size in Atlanta Is solar worth it in Atlanta?

.

What makes a good solar company in Georgia?

In our experience, the best solar companies in Georgia have a few things in common: lots of experience, reliable equipment and transparent contracts. Here are some hiring tips. Avoid scams: One of the most common solar scams involves fake solar companies selling systems without any intention of really installing them.

What is Customer-Sited solar PV and battery storage?

Customer-sited solar PV and battery storage, also known as behind-the-meter systems, refer to systems installed on the customer side of the utility meter. This means that solar generation and energy discharged from a battery meet onsite needs for electricity before any excess electricity is exported to the utility grid.
