Solar windmill water pump

Overview

What is a windmill used for pumping water?

Windmills, specifically those used for pumping water, are commonly found on farms and ranches worldwide. They provide essential water supply for domestic and livestock use, particularly in areas where electrical and fuel-driven pumps are not practical.

Can a Tuhorse solar pump replace a windmill?

In a typical live stock farm, a one time affordable investment on a Tuhorse green energy water system can immediately save you money, and save more in the years to come. Tuhorse solar pumps are ideal replacements for windmill as well. Tuhorse solar pump full kits are packaged to save you time and money.

How many gallons can a solar pump produce?

Solar pumps are expected to maximize the usage of the sun's energy during the day. A setup with a large holding tank is recommended. On a sunny day, 6 hours of pumping can produce over 16,000 gallons with one of our larger pumps.

Are THS solar pumps a good choice?

Backed with our two year warranty, THS series solar pumps are reliable, efficient and cost effective. Choices are from as simple as a 2" 370W or 3" 500W with 1 PV panel to a 4" 2200W (3HP) with multiple PV panels to suit your application. Solar pumps are expected to maximize the usage of the sun's energy during the day.
