Spain EK SOLAR Power Storage Project

Overview

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain [News] The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

Spanish energy firm Zelstra and Portuguese utility EDP have signed what they call the "first" solar-plus-storage power purchase ...

Spanish energy firm Zelstra and Portuguese utility EDP have signed what they call the "first" solar-plus-storage power purchase agreement (PPA) in the Spanish renewables ...

Spain's ministry for the ecological transition said on Monday it has provisionally awarded EUR 839.7 million (USD 977.4m) in funds to 143 energy storage projects that will add ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in ...

Spain's EUR700M plan adds 2.5-3.5 GW of energy storage to boost renewables, cut emissions, and strengthen the grid.

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive withdrawal of nuclear generation. ...

Spain's EUR700M plan adds 2.5-3.5 GW of energy storage to boost renewables, cut emissions, and strengthen the grid.

Spain invests EUR148.5M in solar-plus-storage projects, making battery systems mandatory for renewables and setting a new EU energy standard.

The Spanish energy agency has proposed funding for 144 energy storage sites totaling 2.61 GW and 11.14 GWh under a European Regional Development Fund program.

The innovation energy storage project auction is seeing positive outcomes for Spain with a series of projects announced, and a domestic battery manufacturer rapidly expanding

...

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive ...

The Caceres Solar Power Plant - Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Caceres, Valdeobispo, ...

The European Commission has approved a new aid scheme that will allow Spain to

deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

This new funding builds on earlier support under Spain's Recovery, Transformation and Resilience Plan (PRTR), which has already mobilized EUR730 million for 4.5 GW of storage ...
