## Overview

---

Does Stockholm Water Front use a lot of energy?

Stockholm Water Front consists of three buildings with completely different energy requirements. The office building doesn't use much energy in the evening and at night, while the hotel has its highest energy consumption in the morning and evening.

What are some examples of energy efficient buildings in Sweden?

The other example is Kungsbrohuset, situated by Stockholm Central Station. Its energy solutions make the building so efficient that it only requires 51 kWh per sqm a year, which is half the energy consumption prescribed by the Swedish National Board of Housing, Building and Planning.

Is Stockholm Waterfront Congress Centre energy efficient?

The water is stored in 250 tonne ice tanks in the basement at night and used at peak hours during the daytime. These measures make Stockholm Waterfront Congress Centre one of the most energy-efficient buildings in the world, achieving the LEED Gold standard. The other example is Kungsbrohuset, situated by Stockholm Central Station.

Where is the Stockholm congress centre located?

Located between Stockholm Central Station and Stockholm City Hall, the congress centre was built in 2011 and comprises 72,000 sqm of space, with conference halls, offices and a hotel. Many of the materials used to build the centre were taken from the previous building on the site.
