Sudan 5g base station address

Overview

What is Zain Sudan's mobile network?

Here are some key points about Zain Sudan's mobile network: Zain Sudan provides 2G, 3G, and 4G mobile phone services, covering over 90% of Sudan's population with a large network of Base Transceiver Stations (BTS) installed across the country.

Can I measure a 4G base station if I'm connected to 3G?

Using the application, you can only measure stations on the network that you are actively connected to. Therefore, you will not be able to measure a 4G base station if you are currently connected to a 3G network.

What frequency band does Zain Sudan use?

Overall, Zain Sudan has established itself as a leading mobile operator in Sudan, providing extensive coverage and innovative services to its subscribers. Zain Sudan uses the GSM 900 MHz (E-GSM) frequency band. This band operates on the uplink frequency range of 880 MHz to 915 MHz and the downlink frequency range of 925 MHz to 960 MHz.

How do I view the location of a mapped base station?

To view the location of a base station on the map, open the maps tab in the left side main menu of the Cellular Coverage and Tower Map - CellMapper application. The location of already mapped base stations is shown on the map. The application will automatically display only the base stations of the current network being used (LTE in the picture). Base stations can also be viewed on the Cellmapper webmap.
