

**NKOSITHANDILEB SOLAR**

# **Sukhumi solar container communication station EMS Sub- item**

## Overview

---

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

What is energy storage EMS?

The energy storage EMS supports receiving and dispatching the control target value sent by the multi energy cooper-ative controller of PPC master station or local PPC sub station in real time.

Does EMS support single energy storage unit control?

Similar to active power control, EMS also supports single energy storage unit control when controlling reactive power. The user can set the single energy storage unit into three types: automatic control, free power generation and manual setting.

How does EMS control energy storage power stations?

EMS regulates the stable change of active power of energy storage power stations to avoid short-term impact on the power grid. The control objectives include 1-minute change rate and 10-minute change rate. The change rate of active power can be adjusted by configuring energy storage batteries with an installed capacity of 10%.
