What are sinetech supercapacitors?

Sinetech's supercapacitors are designed to maximize efficiency, offering a dependable solution for your power storage requirements. Supercapacitors are renowned for their rapid energy storage and release capabilities and they are a popular solar energy storage system.

Are supercapacitors good for energy storage?

When it comes to energy storage systems, supercapacitors are popular for their efficiency. Choose from Probe's premium supercapacitors — perfect for electric vehicles, solar energy storage, and wind turbines. How does a Supercapacitor work?

.

Are supercapacitors efficient?

Supercapacitors can do this with extreme efficiency. Our supercapacitors are equipped with two metal plates that act as conductors and accumulate electrical charges, storing energy. When it comes to energy storage, supercapacitors are incredibly efficient. The supercapacitors at Probe are no exception.

What is a super capacitor?

Super Capacitors (Super Caps) are the next generation energy storage with advanced performance where it matters most. They have a lifespan of more than 30 years with no capacity degradation. A high charge and discharge rate with more than 98% round trip efficiency at a 100% depth of discharge make Super Caps the most efficient way to store energy.
