

NKOSITHANDILEB SOLAR

Supplier of energy storage device in Cebu Valley Philippines

Overview

Why should we invest in energy storage in the Philippines?

“This energy storage project is not just another venture—it is a testament to our shared commitment to advancing clean energy in the Philippines. By integrating advanced storage technology, we are not only enhancing grid stability but also ensuring that renewable energy can be supplied reliably, day and night.

Can advanced storage strengthen the Philippines' green energy system?

“Together with forward-thinking partners, we are ready to shape and strengthen a robust green energy system in the Philippines and Southeast Asia,” he added. SUMEC Philippines General Manager Lennon Zong highlighted the role of advanced storage in the Philippines' clean energy journey.

What is Masinloc battery energy storage?

The Masinloc Battery Energy Storage System (BESS) is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. We started our venture into battery energy storage technology in 2018 when we acquired this 10 MW system from AES Philippines.

Does the Philippines have solar power?

Powering Solar Energy in the Philippines In Southeast Asia, the Philippines has notable achievements in terms of renewable energy with an exceptional record for solar power. The nation has rapidly expanded its solar panel and battery storage production as the economy develops quickly with increasing energy requirements.
