Swaziland BESS sells brand new uninterruptible power supply wholesale

Overview

How big will the Bess market be by 2030?

market to reach between \$120 billion and \$150 billion by 2030, more than double its size today. But it's still a fragmented market, with many providers wondering where and how to compete. Now is the time to figure out where the best opportunities will be in the rapidly accelerating BESS market and to start preparing for it.

Who is a Bess provider?

ive utility-scale BESS a share of up to 90 percent of the total market in that year (Exhibit 2). Customers of FTM installations are primarily utilities, grid operators, and renewable developers looking to balance the intermittency of renewables, provide grid stability services, or defer costly investments to their grid. The BESS providers include:

Will big buyers move to Bess?

ity-focused Big Buyers initiative and Oslo's plan for net zero on construction sites by 2025). Many of the companies that make the switch will start by converting to hybrid genset solutions rather than immediately moving completely to BESS. What about the BESS residential consumer play?
