# Taipei Energy Storage Container Plant 7MWh

## Overview

---

What is the future of energy storage in Taiwan?

Therefore, Taiwan will focus on developing FTM storage, followed by BTM-C&I. InfoLink projects that FTM storage will make up 90% of the energy storage deployment in Taiwan, with solar-plus-storage applications reaching 50%. In terms of economic scale, energy storage market is expected to surpass NTD 10 billion by 2023 and NTD 20 billion by 2026.

Can businesses use energy storage in Taiwan?

However, Taiwan does not provide a favorable condition for businesses to utilize energy storage for now. Other international regulations include RE 100 and ESG. Other drivers include the lowered threshold of 800 kW under the “major electricity consumer clause,” islets, and charging stations.

Does Taiwan have a major energy consumer clause for BTM storage applications?

C&I sector for BTM storage applications is driven by the “major electricity consumer clause.” However, Taiwan does not provide a favorable condition for businesses to utilize energy storage for now. Other international regulations include RE 100 and ESG.

How safe is Taiwan's Power System?

With an eye on the safety and stability of Taiwan's power system, the Longtan system features multiple protective measures for energy-storage safety, including “gas detector,” “isolating switch,” and “clean fire-extinguishing agent,” assuring rapid and effective handling of potential risks under any circumstances.
