The whole roof is filled with solar panels

Overview

What is a whole roof solar system?

Whole roof solar systems mean that your Solar PV panels become the fabric of your roof, serving two purposes, weather proofing and energy supply. The Solar PV panel frames are bespoke for the mounting system so there is a limited choice of panels with these set ups. Luckily there are still good quality panels to choose from.

Should solar panels cover all roofs?

This means if the world covered every roof with sun-tracking panels, it couldn't just cover 2/3 of electricity production, but all of it. It also doesn't cover the potential of large grid-tied solar projects, just rooftops.

How do in-roof solar panels work?

Just like traditional solar panels, in-roof versions use photovoltaic cells to turn sunlight into electricity. The big plus?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:
