Three-phase 45 kW inverter

Overview

What is a 45 kW inverter?

45 kW (60 hp) three phase 240V, 380V, 480V frequency drive inverter, output 3 phase AC 0~input voltage, input frequency 50Hz/ 60Hz. RS485 communication mode and IP20 protection rating. Automatic torque of variable frequency drive inverter boost, manual torque boost 0.1%~30.0%. It is widely applied in industrial transformers, motors, and so on.

How does a 3 phase motor inverter work?

The multiple-function keyboard of 3 phase motor inverter controls the operation of the variable frequency drive inverter, such as start, stop, and acceleration. You can press the corresponding buttons to make the 45kw 3 phase inverter work according to the set frequency inverter parameters or control the inverter machine's operating speed.

What is the control mode of a 3 phase motor inverter?

Control mode includes V/F control and Sensorless vector control, variable frequency drive inverter can work at (-10°C, 40°C), and humidity 5%-95%, without condensation. The multiple-function keyboard of 3 phase motor inverter controls the operation of the variable frequency drive inverter, such as start, stop, and acceleration.

What is a three-phase inverter?

Grid integration: Three-phase inverters are used to connect renewable energy systems, like solar or wind, to the electrical grid. They ensure that the generated power is compatible with the grid's three-phase system, allowing for efficient energy distribution.
