## Overview

---

What is battery manufacturing equipment?

Battery manufacturing equipment refers to the machines and systems used for battery production, fabrication, assembly, and testing. This complex process may require the use of coating systems, bonding and sealing solutions, adhesive dispensers, slot dies, battery testing equipment and more.

What is top of the line battery manufacturing equipment?

This complex process may require the use of coating systems, bonding and sealing solutions, adhesive dispensers, slot dies, battery testing equipment and more. Top of the line battery manufacturing equipment gives manufacturers the opportunity to enhance their product lines, increase efficiency, save costs, and ensure exceptional quality.

Who uses Nordson battery manufacturing equipment?

Lithium-ion battery manufacturers, EV development companies, renewable energy engineers, emobility start-ups, and energy storage specialists worldwide trust Nordson for cutting-edge precision technology and reliable equipment. Contact us for a no-obligation, one-to-one conversation about our range of battery manufacturing equipment.

What is the Targray battery division?

The Targray Battery Division is focused on providing advanced materials and supply chain solutions for lithium-ion battery manufacturers worldwide. We also advise cell manufacturers on their R&D and pilot line equipment purchases, helping identify the best tools and production processes for our materials:
