Total energy storage projects

Overview

Does totalenergies invest in battery storage projects in Germany?

TotalEnergies, on the occasion of Patrick Pouyanné's participation in the Europe 2025 conference in Berlin, and in connection with the company's integrated development in Germany's electricity sector, revealed investment decisions for 6 battery storage projects with 221 MW of new storage capacity and an investment outlay of €160mn.

Why is totalenergies implementing a battery project?

The implementation and integration of all these battery projects will allow us to supply our customers with clean firm power, contributing directly to our targeted 12% profitability in this activity," TotalEnergies chairman and CEO Pouyanné said in the statement.

What's going on with Germany's new battery storage projects?

(Credit: Monika from Pixabay) French firm TotalEnergies has taken investment decisions on six new battery storage projects in Germany, with nearly €160m earmarked for their development. The projects will be developed by Kyon Energy, a subsidiary acquired in 2024. Once operational, the six facilities will have a combined storage capacity of 221MW.

Who develops totalenergies batteries?

The projects will be developed by Kyon Energy, a subsidiary acquired in 2024. Once operational, the six facilities will have a combined storage capacity of 221MW. The projects will predominantly utilise batteries from Saft, another TotalEnergies affiliate known for its advanced battery technology.
