# UPS uninterruptible power supply models for fire protection

## Overview

---

What is an uninterruptible power supply (UPS)?

Our uninterruptible power supplies (UPS) and ancillary products cover a wide range of applications and power – from small offices to large data centers. And for each and every user ABB's mission is to provide power protection that ensures the highest availability and the lowest cost of ownership.

Why should you choose ups for Your Fire protection system?

Our top-quality UPS systems are designed specifically to protect your sensitive equipment and ensure that your fire protection systems remain fully functional at all times. Browse our selection of UPS systems designed specifically for fire suppression and sprinkler systems and ensure that your building is always protected against fire hazards.

Why should you choose a dependable UPS system?

Our dependable UPS solutions provide seamless power backup and surge protection to ensure that your fire suppression and sprinkler systems stay operational during power outages or other unexpected interruptions.

Do ups need a fire extinguisher?

UPS equipment rooms require efficient extinguishing and alarm systems to address fire risks promptly. It is recommended to install gaseous suppression systems (e.g., FM-200) or fine water mist systems in battery rooms, while automatic sprinkler systems are better suited for lithium-ion battery UPS due to their fire characteristics.
