# **US companies exporting solar modules**

## Overview

---

Are solar panels made in USA?

Yes, solar panels are manufactured in the USA. In Q1 of 2025, about 8.6 GW of solar module manufacturing capacity was added to the record. Who is the largest manufacturer of solar panels in the US?

First Solar is the largest manufacturer of solar panels in the US with a production capacity of 10.6 GW as of June 2025.

How is the solar industry growing?

The solar industry is expanding rapidly, with Chinese companies shipping the majority of modules while the US strengthens its domestic base. Global leaders like JinkoSolar, JA Solar and Trina leverage scale to dominate supply, while US firms such as First Solar, Qcells and Canadian Solar grow under supportive policy and rising demand.

How many solar modules can a US factory produce a year?

This dramatic shift represents one of the most successful industrial policy initiatives in recent American history. Today, US solar manufacturing facilities can produce over 51 gigawatts (GW) of solar modules annually —enough capacity to meet nearly all domestic demand for solar installations.

What is the US solar manufacturing ecosystem?

The current US solar manufacturing ecosystem represents a comprehensive network of production capabilities that extends far beyond simple panel assembly, with domestic module manufacturing capacity growing an unprecedented 190% year-over-year in 2024.
