Uninterruptible Power Supply for Kingston Hospital

Overview

What is an uninterruptible power supply system?

Supply Systems. Uninterruptible Power Supply (UPS) Systems are a critical part of a hospital's power supply infrastructure. When coupled with Isolated Power Supply (IPS) Systems and back-up generators, they provide the operating room and other critical care areas with continuity of power in the event of a supply failure.

Why do hospitals have uninterruptible power supplies?

Many hospitals have uninterruptible power supplies dedicated to specific testing bays to ensure a smooth and constant supply of utility power. Navigate outages safely and effectively during emergency situations.

What is a Cyberpower medical grade UPS system?

CyberPower Medical Grade UPS systems have been designed to power and protect sensitive equipment in hospitals and healthcare facilities. Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer.

What is ups for medical centers & hospitals?

UPS for medical centers and hospitals deliver backup power in emergencies and ensure power conditioning for critical equipment. [Learn more.](#)
