Uninterruptible Power Supply for Network Cabinets in Sydney Australia

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that offers battery backup in the event the main electrical supply fails or drops. Smaller UPS systems deliver power for a few minutes or so – just enough time to save any important files and shut down the computer properly. Larger systems have enough power to last several hours.

Does Schneider Electric provide a ups power supply?

Schneider Electric provides a UPS power supply for homes, data centers and industrial environments. Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions.

What is a ups power supply & how does it work?

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from mains power and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.

What are the best power management solutions for SMBs?

The Amplon Family offers ideal power management solutions for a wide variety of SMB. The Agilon family are single phase UPS systems for power rating requirements under 1.5 kVA, that can support PC products, peripherals and small POS systems.
