

# Uninterruptible Power Supply in Mbabane

## Overview

---

What is an uninterrupted power supply (UPS)?

UPS, uninterrupted power supply by LegrandAn uninterrupted power supply or uninterruptible power source (UPS) is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

What are industrial-grade uninterrupted power supply systems in Australia?

Industrial-Grade Uninterrupted Power Supply Systems in Australia Power interruptions can be costly. APS Power's Uninterruptible Power Supply (UPS) solutions ensure critical operations remain online, protecting sensitive equipment from outages and fluctuations.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

How long does an uninterrupted power source last?

The on-battery run-time of most uninterruptible power sources is relatively short (only a few minutes) but sufficient to start a standby power source or properly shut down the protected equipment. It is a type of continual power system.
