# **Uninterruptible power supply for Wellington Power**

## Overview

---

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), is an easy-to-install device designed to provide backup power to computers, servers, server rooms and data centres in the event of a main energy failure, electrical surge or unexpected power cut.

Why should you choose Phoenix Contact uninterruptible power supplies?

Ensure superior system availability with our power supply systems. Find out about power supplies, DC/DC converters, redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

What is ups power supply?

An uninterruptible power supply (UPS) is a backup power device that keeps equipment running during outages and shields it from surges. It bridges short blackouts, giving you time to save work, stay connected and shut down devices safely.

How do uninterruptible power supplies work?

For more information, check out our complete guide to uninterruptible power supplies. An online UPS system supplies power by converting incoming AC power to DC and then reconverts it to a stable AC output through an inverter, all while continuously charging the batteries.
