Overview

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

Why do you need a UPS system?

In times of energy transition, our UPS systems protect against system failures caused by interruptions and disturbances in the grid feed. Customers from the telecom, railroad, power generation / distribution, chemical industry, among others, have been relying on the high quality and reliability of our UPS systems for decades.

What is a Gustav Klein UPS system?

Gustav Klein UPS systems are equipped with a colour touch screen display and consist of the components: Supports consumption-optimized networks (input THDi \leq 6%, hardly any reactive power consumption, battery test by means of mains regeneration and full UPS power).

Does ABB offer a standalone or modular UPS?

For every application and every context, ABB has a standalone or modular UPS. From the world's largest data centers to office server rooms, ABB solutions lead the field in UPS innovation. Speak to our experts for customer-focused critical power solutions that deliver more – space, savings and scalability.
