Valletta s first batch of energy storage power stations

Overview

Did Tesla export its first batch of energy-storage batteries to Australia?

SHANGHAI, March 21 (Xinhua) -- Tesla's new Megafactory in east China's Shanghai on Friday exported its first batch of Megapack energy-storage batteries, the company announced. It took the new Megafactory just over a month after its production launch to achieve its first export, with the batteries being transported from Shanghai Port to Australia.

Did Tesla ship a Megapack energy storage system to Australia?

Where is Tesla's new energy storage megafactory located?

Tesla's new energy storage Megafactory in Lin-gang Special Area – a part of the China (Shanghai) Pilot Free Trade Zone – went into operation on Feb 11, with the factory's first Megapack battery system rolling off the production line.

What energy storage system does Tesla use?

All of its energy storage units will use Tesla's Megapack electrochemical energy storage system produced at the Shanghai Megafactory. The electricity generated by the photovoltaic system will be directly supplied to the Megafactory, with excess power automatically stored in the Megapack for future use.
