Vatican solar container battery Exchange Cabinet Site

Overview

Why did Pope Francis ask the Vatican to build a solar farm?

Pope Francis last year asked the Vatican to study developing the area into a vast solar farm, hoping to put into practice his preaching about the need to transition away from fossil fuels and find clean, carbon-neutral energy sources. Pope Leo XIV visited the site in June and affirmed that he intended to see Francis' vision through.

Will Italy turn a 430-hectare field north of Rome into a solar farm?

(Yara Nardi/Pool Via AP) ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City into the world's first carbon-neutral state.

Will Italy pay taxes to import solar panels?

Details weren't released, but the Vatican will be exempt from paying Italian taxes to import the solar panels, but won't benefit from the financial incentives that Italians enjoy when they go solar. Italy, for its part, can use the field in its accounting for reaching European Union clean energy targets.
